Australasian Neuroscience Society 41st Annual Scientific Meeting

Call for Abstracts Guidelines

Key Information

- Oral Presentation and Poster Presentation submissions close on **5PM AEST, Monday, 31 July 2023**.

- You can indicate your preferences for an oral presentation or a poster presentation. While every effort will be made to accommodate these preferences the Programming Committee cannot make any guarantees.

- Poster abstracts may be selected for 3-minute data blitz presentations within symposia sessions that are designed to increase exposure and promote interaction between conference attendees and poster presenters. This will be by invitation of the Local Organising Committee (LOC).

- Multiple abstract submissions per person are allowed but registrants can give only ONE oral presentation for the entire conference.

- By submitting your abstract online, authors consent to their abstract being reviewed and published in conference material where appropriate.

- Outcomes will be notified via email to the submitting author in late-August 2023.

Abstract Presentation Types

Oral presentations are 15 minutes long in total. Speakers should allow for a 10-minute presentation followed by a 5-minute question period.

Poster presentations should be A0 (841mm wide x 1189mm high) and in portrait orientation (not landscape). Posters that do not fit this format risk not being displayed.

Abstract Submission Process

All abstracts need to be submitted via the online portal, Currinda. Prior to submitting your abstract, you will first need to create a profile in Currinda if you do not already have a profile. This is a simple step and will take less than two minutes to set up.

The online portal will allow authors who have submitted an abstract to review and/or edit their abstract until the closing date of 5PM AEST, Monday, 31 July.

Submission link: https://tas.currinda.com/register/event/2309

Abstract Preparation Guidelines

- Abstracts are to be typed straight into the text field in Currinda. It is recommended that authors have this text ready to copy and paste (ensuring that no formatting carries across).
- Abstracts should cover objective, brief method, key findings and a conclusion.
- Abstract body text must be no more than 250 words – you will be stopped once the text box reaches 250 words.
- Ensure you select one presenting author (only) by ticking the appropriate box in the author list.
- Include the first name, surname and affiliation (institution) of all authors separately.

Please ensure you follow all the steps in the process, then click '*Submit*' when you have completed the process. An automatic acknowledgement email will be sent once your abstract submission is complete.

Research Themes

You will need to select a theme that best represents your abstract submission from the list below:

- Autonomic/neuroendocrine systems
- Brain cancer, neuroradiology and neurosurgery
- Cognitive neuroscience
- Computational neuroscience
- Glial biology
- Limbic and other systems
- Motor systems
- Neural development, neurogenesis, and regeneration
- Neurodegenerative disease and injury
- Neuroengineering
- Neurological and psychiatric disorders
- Neuronal excitability, synaptic transmission, synaptic plasticity
- Neuroscience history, ethics, and teaching
- Neurovasculature and metabolism

- New techniques in neuroscience
- Sensory systems
